5. Waste Minimization Statement

In the case of the K106 Waste, ASHTA continues to work on decreasing the both the salt and mercury content in the sludge and maximizing the efficiency of the press that dewateres the sludge in an effort to minimize the volume of the waste generated. ASHTA continues to implement mercury reduction projects in an effort to reduce the mercury levels in the waste.

Additionally, ASHTA has committed to replacement of the existing mercury cell technology with mercury-free membrane cell. Therefore, we anticipate that this waste stream will be delisted over the next few years.
